Mauricio Antonio Erazo Sosa
Web Developer / BA

Web developer with a background as a Military Pilot. First experience in building web applications from scratch as well as trained in making decisions in critical moments whilst adhering to strategic plans. Always looking to foster a safe and trusting environment to make a positive impact on the projects and the users.

Professional Experience

07.2022 – 09.2022
Full-stack MERN movie application myFlix, CareerFoundry Program.
- o Built a movie app that allows users to log in, update account data, and access information about movies from a database.
- o Created REST API using Node.js and Express.
- o Stored Data in MongoDB, using Mongoose to interact with the database.
- o Tested API endpoints with Postman, and also created Documentation on the endpoints.
- o Implemented HTTP authentication and JWT authentication.
- o Built SPA with React and Redux, which fetches API data with Axios.
- o Designed UI with React-Bootstrap and SCSS.

04-2021– 04.2022
Operating Logistic Assistant, Gorillas Munich
- o Maintained efficient storage, and custody, and conservation service for all types of merchandise.
- o Avoided delivering damaged products by supervising storage and available products.
- o Decreased the percentage of product complaints delivered to customers.

12.2012 – 12.2020
Salvadoran Air Force Pilot, Second Air Brigade
Deputy Head of the Civil Affairs Department
- o Liaised with nearby governmental institutions and maintained close communications serving as an interface to the air base to exchange information or necessary support for the population
- o Fostered a secure and trusting environment among entities.

Active Pilot | 2016 - 2020
- o Performed flight missions according to the needs of the country, for example, search and rescue, and patrolling areas of interest while proficiently performing air defense practices against possible threats.
- o Tactically planned the flight missions considering various factors such as the atmospheric circumstances and the type of mission to be performed to ensure successful mission outcomes and the safety of the crew.
- o Gained experience in decision-making according to the flight assignment, and successfully performed flight missions safely.
